Q1

Greetings. I am Juliano. We are the Arcturians.

Let us meditate together on the energies of the Planetary Cities of Light. To the best of your ability, project yourself above the earth, in a position perhaps 50-60 miles away from the land of the earth, above the earth. A position where you can see the energy fields of all of the Cities and look around the earth and see special spiritual light, coming, rising up, from each Planetary City of Light that is represented here today.

As you look above the earth, you see this beautiful connection of fifth dimensional light with each Planetary City of Light. It is a beam of beautiful white light and now you beautifully see from this perspective how each Planetary City of Light is interconnecting. That is, that each Planetary City of Light has an energy field connection with other Planetary Cities of Light.

And from this perspective above the earth you see the links, the global connections, from the Planetary Cities of Light Project. And you send a *strong* connecting energy force to make this connection, these connections, between each of the Planetary Cities of Light stronger and stronger. So now we will go into mediation as you all,

with me, hold this light connection between all the Planetary Cities of Light. We will go into silence.

(silence)

Send your arcan power to each City of Light making each City of Light stronger and more connected to other Cities of Light. See this blue energy of arcan power connecting to each City of Light.

(silence) ...Om

Let each Planetary City of Light be blessed with intense fifth dimensional energy and light. (silence) ...and may the connected power between each City of Light be shared so that the strength and growth from one area can transfer powerfully to each other area, to each Planetary City of Light and Ocean Reserve of Light. (silence) ...You and I together are holding the energy field of light for all of these Planetary City and Ocean Reserves of Light.

I am Juliano. Good day.

Q2

Greetings. I am Juliano. We are the Arcturians.

We have designated the Tree of Life known as the Kabbalah Tree of Life into a new title called the Planetary Tree of Life.

There are several reasons why we have done this. The configuration of the spheres and the paths have a special healing power. This Tree of Life pattern exists throughout the galaxy. This Tree of Life system is the basis for planetary development and expanded consciousness throughout the Milky Way galaxy where you live.

How can we transfer higher light and higher knowledge into an improved third dimensional reality?

One answer lies in manifesting fifth dimensional energy spots or locations throughout the planet. We have designated the 12 etheric crystals and we have said that the 12 etheric crystals are representative of holding special light contained in the Tree of Life.

It is our belief that in order to bring down a fifth dimensional energy, you must have a receiver; you must have a vessel to hold the light. There are different ways of talking about vessels. Sometimes the vessel is pictured as a pitcher holding water. You want to store it; you want to save it. So, each of these spheres has a designation where a vessel was downloaded to hold the energy of that particular sphere.

You know we have talked many times about the 12 etheric crystals. And how the many areas such as Gross Valley, such as Mt Fuji, have been designated and have been worked with by you, the Group of Forty and the star seeds, to hold the energies of Divine wisdom, divine compassion, divine judgment, divine knowledge, divine harmony and balance. So, each of these areas are represented by the 12 etheric crystals.

This in itself is a new development in working with the Tree of Life because the development of these 12 etheric crystals is set up for planetary healing energy. It is set up to receive and hold this higher energy and to communicate with each other. So, there have been many questions about the meridians and how the earth meridians can interact with each other. We have jokingly called this a by-pass system where we are setting up a new meridian system with the 12 crystals.

The second part of this is that these 12 etheric crystals are representing the 12 healing energies of the Tree of Life and they must have links to them just as meridians are linking energy systems. You have the kidney meridian, linking the kidney meridian throughout the body. You have the heart vessel meridian. You have the lung meridian. They are connecting energies. So, the systems don't exist independently but rather the systems have to interact.

So, we came up with a second method which is to create *links* between the 12 etheric crystals. The first step you have already accomplished, which was to download the 12 etheric crystals. The second is to create communication paths between each crystal.

So how is the energy of divine judgment going to communicate with the energy of divine compassion? Because we know from the Tree of Life that you cannot speak of one energy without the other. They must be dealt with as pairs. Actually, in truth, they must be dealt with as triangles, as triads. We suggest now that you assign 22 Planetary Cities of Light because there are approximately 22 paths. We would have to look at the number again because there was a new addition added. Generally, we are talking about the 22 paths and each Planetary Cities of Light is assigned a path. Now this path-work, these path ideas, have been explored on an individual basis through the Tarot cards. If you would take the Tarot cards, you would find that there are 22 major Archana or 22 major cards that represent the key path to enlightenment. If you as an adept are wanting to go to enlightenment, you have before you 22 cards that delineate different systems, different energies that you must work through.

They have done this with some success. In fact, the original Tree of Life did not include the 22 major arcan from the Tarot cards but it was later added. Even today in the teachings of the Tree of Life, the path work is the most complex and most mysterious part of the Tree of Life, yet it is so important.

Now we are saying, let us now develop a path toward planetary ascension.

Let us develop a path toward planetary enlightenment. We have the 12 etheric crystals as the basis of the spheres, so we need to add 22 Planetary Cities of Light to volunteer to teach each path. When I say “to teach each path”, (I mean they) teach themselves first. How can, for example, compassion and judgment be linked? So, if you as a Planetary City of Light agree to be responsible for following, teaching and holding the path-work energy, then you will begin to investigate:

What does it mean to be a link between 2 spheres?

What is it teaching us?

What lessons do we have to learn?

What lessons does the earth have to learn in order to bring to fruition, to general knowledge the teaching, the energy from that path?

It is called “*path-work*”. In the Kabbalah Tree of Life there are 32 paths because each sphere is a path. But remember I have already pointed out, we have already designated the 12 spheres. We have done this in a way to geographically locate each one because we are trying to embed these ideas in the energy field of the earth.

Now we are going to the second phase: The Path-work of designating individual, geographical Planetary Cities of Light as teaching and holding the path energy work.

So, this is the theme. This is the energy. This is the task.

And I think now that the Group of Forty is in a better place to understand this. Look, you are working towards teaching and promoting the enlightenment of the earth, the ascension of the earth, the bringing of the earth to the next stage. You have done a great job in holding the energy of the etheric crystals and now we can move towards the path-work. And I give you total creative power to choose which Planetary Cities of Light would want to be which path. Let your committee review and choose and approve that. It does not have to be that complicated.

Even if you do not understand the path, say you do not understand what the path-work is between making a connection between compassion and justice and how that works in the planetary healing.

Don't worry if you don't understand it. Then this is the task for you as a *group*, as a Planetary City of Light *group* to work towards. You will be learning, so you do not have to have the answers. You just have to have the desire to study and work with that path. Each path is central to the planetary development. I mean we could take any earth problem, contamination. And say for example, how do you balance contamination, pollution? How do you balance the refugee crisis? How do you balance that with justice, strictness versus compassion?

What knowledge do you have to have about the galaxy to bring this planet into alignment?

How do you protect this planet from asteroids? How do you protect this planet from

earth changes that are going to potentially destroy the biosphere, as you know it?  
These are things that are contained in the *planetary path-work* which I am  
recommending to you: that you choose 22 Planetary Cities of Light and work with  
each path.

I am Juliano. Good Day.
