Greetings. I am Juliano. We are the Arcturians.

Today I want to talk about the Noosphere and the Planetary City of Light Project and your activities. The idea is that the Noosphere is a collective thought field energy that surrounds the aura of the planet. The Noosphere is able to shape the evolution of the earth and the evolution of humanity. There are different ways of influencing and inputting the Noosphere.

Today I want to talk about the interaction of groups of people, the interaction of Cities of Light and I want to show you and explain to you how this interaction does have a direct influence on the Noosphere.

Try to imagine interactive roads, interactive lines. Your Planetary Cities of Light are creating a *network*. This network is like a highway in which you are interacting and you are creating pathways. You are creating thought-fields. You are expanding the thought-fields. Therefore when there are more connections this means that the influence on the Noosphere becomes stronger.

One of our main presentations and main goals is to create a network of Planetary Cities of Light and of Planetary Ocean Reserves of Light. But these Planetary Cities of Light and of Planetary Ocean Reserves of Light do not stand alone, but rather they are *interactive*. But when I stay interactive I want you to understand that it is *empowering*, it is increasing the effect on the Noosphere. This is related to simple, rather important, mathematical principles where the power of a number can increase logarithmically by increasing its interactive power. So sometimes you double, sometimes you quadruple, but eventually when you keep on increasing the intensity and the numerical values of the interactions then the influence on the Noosphere becomes logarithmically more powerful.

One of the interesting questions that constantly is asked is, "How can we influence the third dimension? How can we use fifth dimensional energy to manifest, to shape, to change the third dimension in a more powerful way?" Here, with this discussion and with these presentations, you are enhancing the thought field created by the Planetary Cities of Light. Therefore, you are increasing the effective thought power.

This means that the Noosphere is influenced by pictures, influenced by meditation, but it is also influenced by your interaction. Again, I want to return to this principle that Interaction is creating a thought network, a thought field. That thought field already is influencing the planet and influencing other lightworkers

I know that you still may think that you are working alone even though you have 45 Cities of Light. I want to let you know that there are others outside of the Group of Forty who are becoming attracted and are learning about what you are doing. They want to participate; they want to share; they want to understand how you as light workers are creating a network of energy. This network of energy seems to transcend the political boundaries, seems to transcend the geographical boundaries and places, in a very clear and non-threatening way, the unity energy field of this planet. And I want to say again that this is important because there are many light workers like you who want to change this world and want to change this planet but don't want to be involved in the political discussion, who don't want to be involved in the political energy as much as you may be affected by the polarization.

There is a way. The Planetary Cities of Light Project is showing there is a way to transcend the political boundaries and connect with the unified energy field. Think now about how the Planetary Cities of Light Project is creating a unified energy field. Today you had this presentation of the Gold Coast (Australia). And the energy of the Gold Coast may be known to only a few people. I say 'few people' around the planet, but now the energy is being spread out. This is a 2-way energy. The energy, the beauty, the power of the Gold Coast is being announced and becoming part of a network and you are sending your thoughts and you are sending your blessings to the Gold Coast. Because as beautiful as the Gold Coast is, the Gold Coast too is threatened by environmental challenges. You all know about the environmental challenges of the Great Barrier Reef and the problems there. Even though the beauty is being transmitted, think also and send your light, send your energy, to the Gold Coast so that they, the light workers there, have the strength and the power to influence as a thought energy field the Protection of the Gold Coast area.

Let us meditate now and send your light, send your protective blessings to the Gold Coast area in Australia, the Planetary City of Light and the Planetary Ocean Reserve of Light there. We will be in silence while we meditate together.

(silence)

Now your blessings have been received and an increase in protection has been downloaded around the whole Gold Coast area and the Ocean Reserve of Light.

I want to spend just a minute or two talking about the Tree of Life and the paths. There is a particular method that we have been teaching to show, in a visual way, how each City of Light can participate in the Tree of Life.

I realize that the Tree of Life is a complex pattern. There are 12 spheres. There are 22 lines that are paths. It is very difficult to grasp easily what the interactions of these are and what the meanings of these are. But we have given you the task, if you are so interested, to *work* the Tree of Life. To work with placing the Planetary Cities of Light in different paths. Now, to what purpose? And how will this benefit our work together?

You see the Tree of Life is also a paradigm and it is a powerful interactive force because it contains triangles, because it contains spheres, because it contains geometric patterns. You see, with your meditating, with your discussing, with your placing the Planetary Cities of Light on the Tree of Life you are creating an interactive paradigm, an interactive pattern. And then, with your discussions and with your placements and your drawings, that whole map is going to be downloaded into the Noosphere.

It is going to have a very positive effect on the planet and on the trees and on the Cities of Light. Why? Because remember we have discussed the effect of the Crop Circles on the Noosphere. In fact, one of the main functions of the Crop Circles is to shape the planetary evolution by downloading a powerful force into the Noosphere.

Now the Tree of Life is also a *pattern*, as I said a pattern of circles, a pattern of spheres, a pattern of triangles, a pattern of vertical lines, a pattern of horizontal lines, a holographic pattern. So just like a Crop Circle, the Tree of Life has these powerful forces and patterns. By placing Cities of Light in different paths and lines then you will download the 'whole enchilada', as you say in your language, the whole energy, the whole picture, into the Noosphere. It will have a dramatic and powerful effect protecting each City of Light, creating an interactive force and helping to prepare this planet for the fifth dimension.

I am Juliano. Good Day.
