Greetings. I am Juliano. We are the Arcturians.

I want to explain an important aspect of the Planetary Cities of Light work. And I want you to understand this better based on the presentation of the Lago Puelo and San Martin de los Andes. I am observing and I want to say that each Planetary City of Light is unique and each Planetary City of Light coordinator has the creative ability to work with their people and their people and their members. This project, the Planetary City of Light project, is seeking many goals.

One of the goals is to create unity and to create a network, but this unity and this network is also based on individuality. This unity and network is based on the individually of each area. We, in the Planetary City of Light project, are not asking that every Planetary City of Light be the same. We certainly set some standards and we set some rules in which we ask that you participate, such as having 4 members working together, such as setting crystals around the area, and meditating together. But, within that structure and within that framework lies individual creativity, lies individual beauty and expressions of how *you* want to coordinate and emanate 5th dimensional light. It is like a snowflake. Each snowflake is unique. No two snowflakes have exactly the same pattern, but at the same time the snowflakes have to conform to the rules of weather, to the rules of cold, it must be a certain temperature and there must be certain other conditions for the snowflake to develop its beauty.

And this is partly what our goal is in the Planetary Cities of Light project in that yes, we give you a structure and some rules to follow, but also you have and will individually express the power, the beauty, and the fifth dimensional energies of your Planetary Cities of Light.

We have seen demonstrated today the beauty of (the Planetary Cities of Light of) Palermo, the beauty of Lago Puelo, the beauty of San Martin de los Andes. And you see that they are *individual* and they are providing a *uniqueness*, a unique expression of 5th dimensional energy. Yet, even in this unique expression, we find the common bond of brotherhood and sisterhood throughout the planet, the common bond of loving 5th dimensional spirituality, the common bond of creating an atmosphere which will nourish and support individuals who are seeking their own ascension, who are seeking their own path to the 5th dimension, their own path to ascension.

Therefore, we have to acknowledge and *nourish* the individuality and *nourish* and *share* with the global network, the gifts and the special energies that each place, each Planetary City of Light, has to offer in their path of seeking a planetary healing.

Remember in the kabbalah there is this beautiful phrase “Tikun olam”, (meaning) the repair of the world, the repair or mending, of the world. For many different reasons this planet has become unbalanced and has lost harmony, but, at the same time, there are many people like yourself who are working together to bring a new harmony, a new balance. You are showing that there is a possibility. In fact, it is a reality that people in small groups can join together and hold a 5th dimensional light in their home town, in their home city. It will only make it stronger, it will only make your city stronger when you are able to interact and network with the other global Cities of Light.

Finally, let me say that in your work with the Ladder of Ascension, and in your work with the Medicine Wheel, and in your work with your brotherly and sisterly bonding, you are also reaching out to the galaxy, you are reaching out to the spiritual light around this galaxy. For there is a spiritual light force community of masters, of teachers who want to connect also with you, who are looking for your energy field, your devotion. And they, the 5th dimensional masters, the Arcturians are working to connect telepathically, creatively, in dreamtime, in music, in dance, through the Noosphere.

We are all reaching out to you, to bring you our blessings and our 5th dimensional energy.

This means that part of the role of the Planetary Cities of Light is to be vessels to hold the 5th dimensional energies that are being sent down by the masters. It is a rule, it is a law, that in order to send down 5th dimensional energies, there must be people to receive it. There must be people to hold it. Just like we send down 5th dimensional light and energy to the etheric crystals, to the 12 etheric crystals, now we want to send down 5th dimensional light to your Planetary Cities of Light. You are working to create vessels, *holders* of galactic 5th dimensional healing light.

We, the Arcturians, bless you and your Cities of Light. I am Juliano. Good Day.
