

Planetary City of Light General Meeting Minutes
Aug 20th, 2017 at 9am AZ

Announcements:

Recent Activation:

PCOL North Vancouver, Canada, Aug 13th at 5:00pm Arizona time

New Format to monthly PCOL meetings: “meet the PCOL around the world”

May: Australia, PCOL Gold Coast

June: Argentina: PCOL Palermo in Buenos Aires, San Martin de los Andes, Lago Puelo

July: Brazil: PCOL Lago Freitas & PORL Joatinga, Rio de Janeiro, PCOL Sao Paolo

Channeling: There will be a channeling of the Arcturian, Juliano, by David Miller at the end of this meeting. Remember, you may send questions to me during the month and Juliano will answer them at this time.

Planetary City of Light presentations from individual PCOL

USA:

- *PCOL Carson Valley, Nevada*
- *Ladder of Ascension, Job’s Peak, Carson Valley, Nevada*

News from Planetary City of Light Reports for the Month

Romania Cosmin—changes to PCOL at the Black Sea in Romania

Spain-Alvaro—Toledo now has enough members to re activate the PCOL there. People are working together in greater harmony and meeting monthly in preparation for activation. Arcturian School has successful regularly scheduled classes for 5 years. Online line workshop with David Miller in Nov

Next meeting: Sept 24th at 9am

Group of Forty
Planetary Cities of Light Monthly Channeling
Aug 20th, 2017

Eclipse Energy and *Galactic Planetary Cities of Light*

Channeled by David K Miller

Greetings. I am Juliano. We are the Arcturians.

We like to look at the eclipse as part of an important alignment. Part of this alignment is bringing forth energies in a stronger way to the Earth, but also part of the alignment is with the Sun and the Central Sun. Remember that the Central Sun or the Galactic Central Sun came into an alignment with the Solar System and your Sun on Dec 22, 2012.

Perhaps you can view that alignment as a type of eclipse because the Sun passed through the center area of the Central Sun. Now the Central Sun is an etheric energy field that is based in the center of the Galaxy but it is a 5th dimensional portal that holds the spiritual life energy for the entire Galaxy and all of the beings in this Galaxy. It is certainly true that there are many other civilizations and other planets in this Galaxy. The Central Sun holds the life force and creative spiritual light for all of these planets.

So now it is true that the Earth has passed the exact alignment, the Sun has passed the exact alignment, but the distances that we are talking about are huge. So here we are in 2017 perhaps four and a half or four and three-quarters years past that direct alignment. And we could call the direct alignment like a type of totality, similar to the total eclipse. But in totality of the Earth and the Moon and the Sun, the total blockage of the sunlight is usually 2 minutes and 40 seconds or two and a half minutes, and then the eclipse is done. Sure, it takes several hours for the alignment to come in but the total eclipse itself is 2 minutes 30 seconds, approximately.

Visualize that the galactic center is 26,000 light years away and 1 light year is 5 trillion miles, approximately, and multiply that by 26 and you would, hopefully, understand that we are not in total alignment as you were on Dec 22, 2012 but you are still in a large portion of the alignment. Because 5 years is such a small time and the movement from the exact center of totality on the Central Sun has not gone that far away.

So now we are in the eclipse and that means that the alignment is not only with the Moon and the Sun but it is a special alignment with the Central Sun, 26,000 light years away and it is a strong alignment. That alignment with the eclipse alignment offers then magnification of light and energy to the earth. It is this magnification of light from the Central Sun and total eclipse that needs to be discussed because you are able to amplify the Planetary Cities of Light Project during this eclipse. One of the major ideas in the Planetary Cities of Light Project is creating a network on the Earth which you are working very hard to do.

I know there has been a lot of resistance. I know that it is still quite a difficult task to recruit people and to get people to understand what we are and what you are trying to do. Because, basically, you are trying to create 5th dimensional Cities of Light that are protecting and holding energy and removing darker energy and darker forces. We all know there is enough dark energy on this planet already. We need to create havens and sanctuaries of higher light.

But the second part of this Planetary City of Light Project is to connect with the Galactic Cities of Light. It is amazing to speak about this because in earlier lectures I said there might be as many as 500 civilizations around the Galaxy, higher civilizations with advancement. The Planetary Cities of Light Project is Galactic.

There are Cities of Light in these many other planets. The Planetary Cities of Light which are Galactic in nature want to connect with the Earth Planetary Cities of Light. So not only are we talking about you creating a *network* on the Earth but, as far out and as difficult as it is to imagine, your Planetary City of Light Project has the ability to *connect* with Galactic Planetary Cities of Light. And those Galactic Planetary Cities of Light are wanting to reach out to you. Now some of these places are Moon-Planets.

You have heard the fantastic estimates about the number of planets and the numbers of Solar Systems that exist in this Galaxy. Remember this Galaxy may have as many as 2 hundred-billion stars. Even if 20% of the stars have solar systems, that is still 40 billion solar systems that are in existence. And of those solar systems, even if there is only a small percentage, 5%, that's still 2 billion planets.

So, I wanted to add the other figure. The other amazing figure is that many planets, or many Moons, have planets. Many Moons are what I call Moon-planets, where the Moon is the size of the Earth and for one reason or another, the life developed on the Moon instead of on the planet. There are various technical reasons why this happens. It has to do with the relationship between the sunlight and the Moon and the angle of the axis of the Moon versus the angle of the axis of the planet. It is very technical. The point is that there exists Moons that the Arcturians call Moon-Planets. These Moon-Planets become part of the Galactic Planetary Cities of Light Network.

So here at this time, we are having this wonderful eclipse alignment. I would like for you to meditate for a moment with me, on the alignment and on the acceleration and the downloading of galactic energies from the Planetary Cities of Light around the Galaxy. For when you connect with the Central Sun, you are able to reach out to all planets in our Galaxy if they have light.

So let us meditate together now on the alignment with the Central Sun, The Earth's Sun, and the Moon and the Planetary City of Light Project on the Earth and the Galactic Planetary City of Light Project throughout the Galaxy, all coming into Unity and acceleration. We will be in silence now.

(Silence)

Let the light of this alignment strengthen the Planetary Cities of Light Project and may there be further opportunities to connect with the Galactic Planetary Cities of Light around the Galaxy for they, that is the Galactic Cities of Light, are *aware* of your work here on Earth. Yes, it may be a small number, but remember that your Cities of Light are transmitting energy and awareness throughout the Galaxy to the other Planetary Cities of Light who meditate regularly and seek out to connect with all Cities of Light around the galaxy.

I am Juliano. Good Day.
