

**Arcturian Perspectives with Dr. Suzanne Lie and  
Special Guest David K. Miller of the Group of Forty**

*{We are celebrating Arcturian unity among diversity as we serve  
as a model for group collaboration that will accelerate humanity's  
consciousness expansion and amplify unified efforts to uplift the planet}*

**David K. Miller Channels The Arcturians:**

Shalom, Shalom, Shalom and Greetings. I am Juliano, and we are the Arcturians. This is a time of great importance, and it is a time when collaboration has a powerful influence on "The Work."

It is true that many of the Star Seeds like your selves have opened up to your Soul Mission and Soul Light. However, it is also true that we need to develop ways of using more powerful group interventions on the planet and within the consciousness of the planet.

This is the time in which the consciousness of man is uniquely intertwined with the development and energy field of the Earth. This is the time when the entire outcome of the planet is dependent upon what humanity does.

If humanity makes the wrong choices, then the whole biosphere with all of the plants and animals can take a *very* downward turn. We are at a point of awakening, and there are many people eager for your leadership.

There are also many people who are eager for directions on how to proceed. It appears that those who are waiting are eager to hear the right direction, the right outcome, and the right way to shift this planetary energy.

Our mission has been to activate and to direct without interfering in the planetary process, which is the process of raising the spiritual life quotient. Our main task is to answer the question, which we are sure you have asked yourself.

This question is, "What is the best method for manifesting the fifth-dimensional energy and Light into a positive outcome, and into a positive effect on the planetary situation?"

This question is something that we, the Arcturians, have been studying in our galactic travels. Because, as you know, there have been other planets at this point who have struggled with this conflict.

The conflict to which we refer is the conflict of technology vs. spiritual wisdom. It has been observed that this issue is *not* always favorably resolved. In fact, some planets have collapsed. Some planets have *not* successfully resolved this conflict and moved on to the next stage of planetary development.

Hence, our mission and our task is to see what gatherings, what group interactions, what strengths a planet has that will ensure that the connections with the fifth-dimension will, in fact, produce the necessary healing and unity within the Earth.

Now, it is true, as you have said, that this planet is multi-diverse, which is a plus in many ways because of the Spiritual Freedom and the Free Will Choices.

But, the downside of this multi-diversity is that it becomes more complicated, and difficult, to bring humanity together in unity. Look at how many different individual groups there are.

Look at how many different religions, and how many different languages there are. This, it is just an indication of the complexity that exists. And,

this is also true in the spiritual groups and the fifth-dimensional, multi-dimensional groups. We have found many different groups who have various nuances and various focuses.

And so, we the Arcturians, say, “Why is it that these groups have NOT come together? Is this a reflection of the symptoms of the diversity and polarization that is also present? If so, we would think that with all the diversities, and all of the differentness, that the spiritual groups would be leaders. And why?”

The answer is very simple. This planet has a history of misuse of spiritual leadership and spiritual groups. There have been countless times where the spiritual leadership has been misused for ego purposes and domination.

So, even at this point, which we would consider a “Planetary Crisis,” there is hesitancy and a resistance for groups to unite. Even though it would be for the highest good and the greatest interest for all to find a way of unity, that unity does not occur!!

Therefore, the issues of resistances must be dealt with, but we repeat, it is of great benefit to work together in Higher Light for the greater purpose of raising the Spiritual Light Quotient on this planet!

I am Juliano. I wish you good day.

**Sue Lie Channels the Arcturians:**

Yes, we the Arcturians through Suzanne Lie, would like to add to and fully agree with what David has said through another component of our Arcturian being. We would also like to add that a primary challenge within your NOW is the challenge of *unity of diversity*.

Once there is unity of diversity there will be more and more solutions. But in order to have unity of diversity, there must be acceptance of diversity. And, in order to fully accept the diversity within each person, you must accept the diversity within your own individual self.

Each of you must be able to go into your own Heart, your own Soul, your own Third Eye, and your own High Heart to gather together the many incarnations, which you have experienced on this wonderful planet Gaia. In this manner, you can realize that you are a perfect example of unity of diversity.

Just as Suzille was born with the ability to remember other lifetimes, many of you are able to remember your many incarnations. Then, as more and more people allow themselves to remember other incarnations, they, too, can pull together the *unity of diversity* within themselves.

In this manner, many of you will discover that some of the people that you may have judged are people that you actually were, and are, within another frequency, or timeline of your self.

Now, this *unity of diversity* within all your incarnations is something that is pretty much impossible within the realm of the third dimensional consciousness. Fortunately, your fourth dimensional consciousness allows each of you the ability to have more fluidity within your expression of SELF, as well as to have many dreams, aspirations and visions that remind you of your Greater SELF.

However, it is the fifth-dimensional consciousness, which will allow all of you, our grounded ones, to begin to remember all the incarnations that you have had, or at least the important incarnations that you have had, so that you can pull together all these different lives, different incarnations, different beings, and different people that you were, as well as the different planets on which you lived.

First, you will pull your own *unity in diversity* into your own self. Then, once each person realizes, understands, believes, knows the many lives that are within their own personal self, it is much easier for you to accept, understand and embrace the collective of all the beings on Earth as well as the collective of all of the beings on the fourth dimensional Astral Plane, that are aligned with your physical being, as well as your fifth dimensional Lightbody being.

As there is a higher sense of alignment, there is also a greater and greater sense of safety. There is also a greater sense of safety as you feel more free

to express who you truly are. You will also have the confidence to allow you fifth-dimensional self to talk to you without the fear of someone else judging you or thinking that something is wrong with you.

As you remember, you will know, that you are a multidimensional being that has come to earth within this NOW, within this place, whatever place you are in, to assist with the process of Planetary Ascension.

In this manner, you will move beyond the desires and needs of your personal selves, your human selves, or even of your multidimensional self, to fully realize that the planet is a living being. And, that living being needs us. In fact, we have had many incarnations on Gaia's Earth, and it's time to pay her back.

Blessings for all of you who are willing to go through this process and to think first of our planetary being that has allowed us the wonderful, and sometimes very challenging experiences, that have awakened us to the person that we have become within this Now.
