## Q 1 Alessandra in Washington asks:

Hi dear Juliano,

I have read all of David's books, and I have been a GOF member now for over a decade. I have loved all the Q and A's and lectures, but it seems the more I learn the more questions I have. I could fill a book with questions and I am always hungry for more details when a question is answered. My question is: when I ascend will all my questions be answered? Please say yes so I can relax.

**A** I would say to you that if I were in your position on the 3rd dimension I, too, would have many questions because what is happening, the processes and the unfolding of this drama is very perplexing. I would say also that one answer or even one hour of answering and explaining what is going on in this galactic drama being played out on the Earth would not offer sufficient information and answers to satisfy me so I understand why you, Alessandra, also are struggling to understand, to comprehend and to answer the many questions that arise.

It is true that you will have all of the questions about the 3rd dimension answered when you go to the 5<sup>th</sup> dimension. To explain this let us remember that the higher the perspective, the more clear and let us use the analogy in the Kabbalah, which is that there is a 20-story building, 20-story high-rise. On the first floor many things are happening and you can only see linearly and you cannot get fulfillment of all of the answers. If you rise to the 10th floor you will immediately see answers to almost all of your questions because you will see relationships, you will see karmic matters, you will see how the higher world is influencing the lower world and you will see so much that you will achieve a clarity that you could not achieve on the 3rd dimension.

This means that the higher the perspective, the more clarity you will have and more of your questions will be answered. But also remember that even from the 20th floor there are possibilities of questions but let us just be clear that when you ask a question on the first floor, it is coming from a mind that is logical, it is coming from the mind that is based on cause and effect and many of the understandings that come from the higher dimension transcend these cause and effect rules which means that as you go higher up the linear questions become meaningless. But not to worry, as you do rise up you will gain a clarity that you will truly treasure.

## **Q2. Tim in Texas asks:**

Juliano, It has been reported that Mt. Ash in Washington State, United States is a corridor for constant activity by visitors from Sirius, Pleiades, Andromeda, Orion, and Arcturus to name a few, and that sightings and interactions are possible. My question is in 3 parts:

1. Juliano, can this area be considered, a "sacred site" or
2. is it just a corridor connecting the 3<sup>rd</sup> and 5<sup>th</sup> dimensions or
3. is it an area where the Galaxy can download energy for awakening humanity?

**A** Well first let me say when you say "Is it just a corridor?", let me clarify that is a magnificent and valuable thing, to establish a corridor between the 3<sup>rd</sup> and 5<sup>th</sup> dimensions. I want to emphasise that, I don't want to minimise this corridor because it is an important corridor.

Yes, I would agree and promote this area as a sacred site. I would agree that there are many visitors and I would agree that this corridor is wonderful and magnificent. It is possible that at this point many people on this planet are not aware of it and I am always encouraging the establishment of sacred sites, sacred areas. There are many around the planet. There are many around the planet that are undiscovered such as this one and I would be willing to make a guess that the native peoples around that area know of the sacredness of it and even have ancestral grandmother/grandfather spirits around the area.

It would be a great service to humanity, to that area to acknowledge the interactions there, to acknowledge that there are higher dimensional beings there and to acknowledge that it is a corridor between the 3<sup>rd</sup> and the 5<sup>th</sup> dimension. The more acknowledge and recognition of the sacred sites such as Mt Ash, as he describes, the better off that humanity and the starseeds will be. We need an

increase in the sacred areas and I am happy and pleased that you have discovered this and are wanting to promote it.

### **Q3. Chris in NSW asks:**

Juliano, it seems clear that the 6<sup>th</sup> mass extinction has been caused by our choices but it also appears to be steered by a few large corporations. We presume that a large percentage of the population on Earth will disappear over the next 20 years and only self-sustaining communities will take future generations forward. Is this in line with the process that you see for the planet?

**A** To answer this question I want to talk about clairvoyance and future projections. What you described is a possibility. Imagine that you are driving down a country road and your headlights are very wide on the road and you have a great width of vision in front of you, you can see far to the left of the road and the right of the road. Now in clairvoyance and in predictions of the future you have, and you are receiving, many possibilities of events as you look into the future and each of even and each possibility that you see has a probability of occurring. So what you are projecting, what you are receiving, what you are reading about, the information you are getting about this, is what I would call a probability event.

Now we have to say that as we get closer to this event then there are intervening variables which may affect it. Let us say that the scenario that you gave is one possible scenario and yes, I would say that it is in alignment with many of our teachings because we have been teaching about Planetary Cities of Light as being self-sustaining, but we are not wanting to create fear and we are not wanting to say "well, there is going to be this mass loss of life and there will only be these pockets of sacred cities left", because we do not want to contribute to that kind of outcome because the more people that are working and believing in that outcome, then it is adding to the possibility.

We want to add the possibility of harmony and balance. We want to add to the possibility that there will be a resolution. We want to add to the possibility that there is going to be a repair of these polarisations. It is true that there are dark forces, it is true that what you are clairvoyantly speaking of and possibly predicting is a probability and I would say a probability of perhaps 30% to 35% of it occurring but as we get closer there are intervening variables. Intervening variables include the intervention by higher dimensional beings, intervening variables include the emergence of new world leaders and even the first contact.

So there are other variables and I know that there are people who are wanting to prepare for the events that you describe and I think that is a reasonable position. Some people are storing food, some people are storing water, some people have a getaway place where when things really get towards an upheaval they can escape to. You are to follow your intuition but I just want to emphasise that this is one possible scenario. It is a scenario that at this point I think has a 33% to 35% possibility which is high, but it has not been finalised, there are many intervening variables but as you get closer to that point, then each possibility of solution becomes more narrow and less likely. So we are still at a distance (with headlights pointing in a long way down the road) from that but it is a possibility.

#### **Q.4 Ariana in Taos asks:**

Juliano, this is a 4 part question about cleansing PCOL energies. In an older channeling by Lord Alano he talked about placing lower densities into the etheric crystals and then shimmering them to Alano into the duplicate of the Crystal Temple Lake for purification. In Taos City of Light we elevate the Mt. Shasta crystal, shimmer it and ask it to absorb any misaligned energy from the energy field of Taos and then we project it to the Crystal Temple Lake on Arcturus for purification. The reason is that we want to merge with our 5D bodies and purify ourselves while the duplicate crystal is submerged into the lake.

1. If we project it to the lake on Alano - could we expect our 5D bodies to be waiting for us around the lake just like they do on Arcturus?
2. Is the crystal from Earth submerged into the water only or does it actually merge with the original crystal in the lake be it on Alano or Arcturus?
3. Should we shimmer the crystal while it's resting below the ground in order to magnetize lower densities from the ley lines or can this be done by elevating it first?
4. And finally, what would be the best way to do this in a group meeting where several PCOL are present each of them working with their duplicate crystal?

**A** What you are talking about is advanced Planetary City of Light cleansing and we are trying to offer methods that are basic and simplified and easily understood but even when I say “easily understood” the basic Planetary City of Light work still is at a basic level and needs explanations, encouragements and clarifications. Therefore, we are not promoting these advanced techniques that you are talking about because we want to ensure that the basic level of the Planetary Cities of Light work is understood and is practised.

Now working with Alano is a great idea, working with the crystals the way you have explained- it is wonderful and I think that your advanced techniques and your connections to Alano and your connections to Lord Arcturus are excellent. I would only say to you and to everyone that we are still promoting the basic Planetary Cities of Light energies and we, for example, first are wanting to just shimmer the city, we want to work with the aura of the city, we want to work with the networking of others and going into the level that you are doing is an advanced technique that is working there and I am pleased that you are open to the advanced techniques and I would say that it is only for a few who have done the basic work.

I would not be promoting it at this point to the whole group because of the complexity and also because I want to make sure that we have the basic foundation established. We are still at the point of working towards, for example, having 140 sacred cities. We are at the place of wanting to form the networking and we have not really solidified, for example, networking and the Planetary Galactic City of Light project, which I still think is a powerful thing and therefore the using of the crystals the way you have described is a beautiful idea. Continue to develop and work with it and I am happy that you are receiving such powerful information and methodologies that, as I said, are at an advanced stage of this planetary work.

**Q 5: Marie on Gold Coast asks:**

Dear Juliano, it appears an Ebola-type Marburg hemorrhagic fever virus has started to be rolled out. Covid shots presently have given symptoms of hemorrhagic fever but this “new illness” appearing in hospitals will be diagnosed with a new PCR test which will class it as Marburg, so the deaths will not be due to Covid but to Marburg. Rivax vaccine (which is apparently already prepared) will be rushed through to everyone, as was the Covid “vaccine”, but the Ricin in the vaccine can be deadly. Could you kindly comment on this please? With deep gratitude to you.

**A** I want to reiterate the same model which I talked about earlier which is clairvoyance and probabilities. Marie is receiving a clairvoyant, telepathic possibility of a future event and there is good reason why she is receiving this. We know from our observations that humanity's immune system is terribly weakened and the reason why the Covid 19 has been so detrimental to society and the reason why it has affected so many people is because of the weakness of man's immune system and we have noted that there are many reasons why man's immune systems are weakened, from environmental pollution, radiation pollution etc and of course because of the decimation of the biosphere.

All of these and other factors that I have not mentioned are contributing to the weakening of the immune system and there is a possibility of an emergence of another Ebola-like pathogen and emergence of haemorrhagic pathogen that could be even more deadly. This is possible in this global situation. But I would like again to go to this view of probabilities. What you have described still is a probability and I would rate it at approximately a 23% probability so the information, the insights that you have about the Ebola virus and linking it somehow with Covid 19 and the vaccination and the Ricin etc,-- yes, this is a possibility and I want to say also that there is a great possibility that there will be another pathogen emerging in the near future because there have not been any changes or improvements in the immune systems of humanity .

I look at the Covid 19 vaccine, for example, as a bandage on a wound. The bandage is covering up the wound, maybe it provides some assistance but it does not cure this and so what you are pointing out is that there are several other pathogen problems in the future. I would say there are several other possibilities of emerging pathogens that 1) could be linked to Covid 19 and the vaccination and 2) could be linked to Ebola but also there are other variants that are sitting in the forefront or the back front, whatever you want to say, that could emerge and to this point, from our observations I do not see any unified global movement addressing humanity's overall immune response and immune system.

Without addressing that, then each person is individually forced to deal with it by themselves, whether it be through homeopathic medications or supplements, whether it be through working with the aura or other methods. Each one of you has a responsibility to work with your own immune system so that you would not be exposed to further degradations and further insults from pathogens that are even more deadly than the Covid 19. But on a global, humanity basis, I do not see anyone addressing this and remember, these pathogen dangers are linked to the sixth mass extinction, and this means that

you, as humans, can and are subject to extinction-like events. I repeat, I see this scenario that she reported as a 23% probability.

**Q 6. Carel in Newcastle asks:**

Dear Juliano, some people on earth claim to be Arcturian hybrids not starseeds. Could you please explain the difference?

**A** Well it is not a term that I use- Arcturian hybrid. I find that rather amusing and I compare it to the Toyota Prius which has the gasoline engine and the lithium batteries and you have the choice, you can either continue to use the gasoline engine, you could use the battery power or you can use both and when I hear the term 'Arcturian hybrid' I think about that comparison. A starseed is based on 100% earth incarnation, in this incarnation. In other words that you were 100% born on the Earth. The Arcturian hybrid, the way I understand it – remember that I do not use that term, that is a term that others use – is that they may have dualmulti-dimensional soul birthing, that is, that their birthing simultaneously occurred on Arcturus and the Earth so the Earth is like the gasoline engine and the Arcturian birth is like the lithium battery and then it was combined into this lifetime where they became hybrid.

Now that is a little bit different from my perspective as a starseed because a starseed was 100% incarnated in an Earth body. There was no splitting of their soul, there was no splitting of the incarnation. But I would also point out that I do not think it is correct to say that an Arcturian hybrid is not a starseed because that is like saying the Toyota Prius is not a car and it is a car but it has dual modes. I hope that explains it.

**Q.7 Angela in Perth asks:**

Grace has been understood to be not earned, but a gift – I wonder about that. Is that just a 3rd dimensional lack of understanding about how unconditional love works? Is Grace a 'thing' on the 5th dimension?

**A** I do not agree with the statement that grace is not earned but gifted because there is a concept of the righteous man or the righteous woman and the righteous man/righteous woman follows a path of righteousness including righteous actions, righteous thinking, righteous service and grace is often awarded or rewarded to the righteous person. That means, for example, that somebody who is living in lower consciousness and harming people may not, and in most cases will not, be rewarded with grace. In the same way when I

talk about the ascension and the work in the ascension I have talked about grace where you could skip a grade, in other words you do not have to go into another lifetime but you can go directly into the 5th dimension. This is an example where you are receiving grace.

But you still must work towards the ascension. You do not just sit back and wait but you are doing service, you are studying, you are meditating, you are practicing exercises, you are doing many different planetary healing works and then you may be or could be rewarded with grace. The important thing is that you are on a righteous path, if I can continue that analogy. Therefore, grace is awarded or rewarded but usually in the case where there is some righteous inclination. Grace is not given to those who have inclination towards evil and are acting out the evil.

Now the second part which I think is also a beautiful question, she talks about grace on the 5th dimension. Yes, there is grace on the 5th dimension. It is different and grace on the 5th dimension is magnified and increased many-fold from the 3rd dimension and the reason is this. If you look at the Kabbalistic Tree of Life and the Arcturian Kabbalistic Tree of Life you will see that there are the polarities of grace on one side and restriction or judgment on the other. In this beautiful model, unrestricted grace on the third dimension leads to many problems and therefore there needs to be a restriction and the example on a planetary basis is that the planet cannot totally use up all of its resources and continue to destroy itself. There must be some restriction. So you may have the grace to harvest all the oil or harvest all the trees but there is going to reach a point where the Earth is going to respond judgmentally.

This model also works on a personal basis, by the way, somebody can take advantage of your good grace but eventually there reaches a point of restriction or judgment. But on the 5th dimension this restriction and judgment is lifted because there is no punishment on the 5th dimension. There is punishment on the 3rd dimension but on the 5th dimension you have graduated and you are a righteous person and there is no need for punishment, therefore grace is much more intense and much improved and you would not be misusing the grace. Unfortunately as you and I both see, there are many people of lower consciousness who are misusing the grace given them on the 3rd dimension.

#### **Q8. Shara on Gold Coast asks:**

There's been a lot of talk about **pole shifts**. I saw a science program last week that spoke of as many as eight active poles during the shift. Does Juliano have any insight on whether or not there will be a pole shift in

the near future? And, if so, the timeframe and impact on all life forms on planet Earth.

**A** I like to distinguish between the physical pole shift and the electromagnetic pole shift. The physical pole shift is that you have the North Pole and then the Earth reverses and goes upside down and what was on the North Pole now is on the South Pole. So that is like an Antarctica now becomes the North Pole and the arctic area becomes the South Pole. But think for a moment in this scenario the Earth actually turns upside down. Now if that were to happen all life would end on the planet. If that were to happen the Earth's magnetic field and the Earth's gravitational field would be disrupted and the chaos and the energies would be like a tsunami that has never been seen before on this planet, wiping out all life.

No, I do not see that happening. For one thing the moon does hold the Earth into this position and the moon would have to be removed and then the Earth would be gravitationally free to do that but even if the Earth did do that and the moon were gone, it would end life.

So then we have the second aspect of the polar shifts which is the electromagnetic energies where the electromagnetic energies shift or the poles move, in fact the poles are moving, where was due north, say, 50 years ago maybe has moved 30 or 40 miles from its centre and the same in the south. Yes, I do see this electromagnetic energy shift; yes, I do see that there are many factors that are occurring electromagnetically. I do see, for example, that some of the nuclear energy and nuclear testing has affected the electromagnetic gravitational energy field of the Earth and that these magnetic shifts or even the "magnetic reversals" would create a sense of chaos, would create a sense of confusion and there already are some people who are feeling confused.

Take for example, if you were a fish or even some animal that was electromagnetic keyed into the North Pole and now the north has shifted, it would be disruptive. But I do not see that type of shift as life-ending or causing an extinction event and in fact, a pole shift electromagnetically may help to shake up some of the older systems and older belief systems and this type of electromagnetic polar shift that I am talking about can also be caused by solar activity or can be caused by cosmic radiation or cosmic activity.

Remember that the Earth is on a 240 to 250 million year journey around the centre of the galaxy and the Earth and the solar system are experiencing new energies that never before were experienced, even a million years ago. Scientists do not know or understand the newer energy that the Earth could be travelling through and there could be force fields and different electromagnetic sources that would continue to affect the Earth's electromagnetic field.

## **Q.9 Jane on Gold Coast asks:**

Juliano, I have two parts to my question.

1. Is humanity on Earth now showing enough unity consciousness and spiritual awareness for the Galactic Council to step in and assist humanity in removing the global elite who are focused on the destruction of the freedoms of humanity that we all enjoy and the creation of a new automated human?
2. Will the Galactic Council step in and defuse the technologies that have been created by this global elite to achieve this new world order?

**A** The answer begins by saying that there is not enough unity consciousness at this point to counteract the global elitists as you call them. The global elitists, many of them are incarnated from Atlantis, they are repeating the damaging technology and the instituting of control. You must look at karma and also must look at this galactic drama that is manifested and is playing out on the Earth. There are even extra-terrestrial influences. Some people even refer to the global elitists as part of the reptilians for example and I only bring that up because I want to point out again that I always refer to this as a galactic drama, it is not just an Earth drama.

The forces that you are seeing, are a few people dominating the Earth or a few people trying to control everyone, a few people trying to manipulate the resources leading to the destruction of the biosphere. These are what I call planetary 1 stage development conflicts and so the position of the Galactic Council, first of all is there is karmic debt, there are karmic influences that have to be played out and the Galactic Council is not wanting to stop the lessons. On the other hand, if it reaches the point of the possibility of destruction of the planet, if it reaches the point that there looks like irreversible damage, that someone is going to do something irreversibly that will destroy the planet, then the Galactic Council does have the ability to intervene.

Having said that I want to say also that we are close to serious upheavals. There are events close to that type of destructive activity. That is, that some of the events that are now occurring (and I know that there was another question about Ukraine that I want to address), is bringing the Earth closer to destruction.

Remember that there are scientists who developed the end-time clock and they say that 12 o'clock is the destruction of the planet and the planet is at 1 minute

to 12 or 45 seconds to 12 – I do not remember exactly what the figure is – but the point is that it is very close, the world is very close to irreversible damage. Remember that there are many people that are working with the global elitists. You might say “Oh, there are only a few people” but look how many people are cooperating, look how many people are doing the work, look how many people are going to war, look how many people are supporting the elitists. I would say that it is a mistake to just say that it is these elitists because there is much support that they carry with them.

There are karmic lessons that are being played out. The good news is that if it is reaching a point of an irreversible nature then the Galactic Council would authorise an intervention. It has been done before.

### **Q10. Shara on Gold Coast asks:**

Tension between Russia, the Ukraine and US / NATO allies seems to be on the increase every day. Does Juliano have any insights into whether or not this will happen?

**A** Again I am going to look at the clairvoyance and probability and I would say at this point it is about a 75% to 80% probability that it will happen, that is that there will be an invasion by Russia into Ukraine. That is a very high probability. The problem is that the consequences of this will be devastating on many levels; devastating to the world economy, devastating to the world order, devastating to Russia, that eventually Russia is going to suffer greatly and our prediction is that if you are scoring, that Putin will lose. I mean that he will initially have a victory in terms of militarily gaining superiority but the long-term consequences to his army, the long-term consequences to him and to the world economy will be devastating.

This is a major crisis for the planet and when I say there is an 80% likelihood of it occurring then this is a very dangerous possibility that will affect everyone on the planet. It is hard to maybe grasp how one event would affect the whole planet because in earlier times you might say well these are just two rival countries and they are just playing out old ancestral conflicts which is true, these are old ancestral conflicts. But we are in a holographic world where many people's attention is on this one possible. Event. There could be multiple consequences and I also want to point out that in probability of outcomes there is the theory called “unintended consequences” and there are devastating unintended consequences to the environment from this assault.

So we are encouraging all to pray and to meditate that there will be a peaceful solution. This type of invasion will create more chaos on this planet.

### **Q 11. Carel in Newcastle asks:**

There are hundreds of stone circles in different countries around the world. Some are very old like the Callanish Standing Stones in Scotland which predates Stonehenge by at least 2,000 years. The one in Nabta Playa, south of the Great Pyramid of Giza, is even older, built 7,000 years ago. You have told us that Stonehenge is a direct portal to Inner Earth.

My question is:

1. Do any of these other stone circles, have portals as well?
2. Do they have any spiritual significance?
3. Why were they built and what was their purpose?

**A** To understand these stones and why they were built you must go back and see the night sky when they were built. As you know, the night sky 10,000 years ago or 8,000 years ago did not look exactly the way it looks today. The stars are slowly moving, in a circum-polar path due to the precession movement of the earth . Nonetheless if you looked at the pyramids and you looked at the Belt of Orion and then you would say, well, 5,000 or 6,000 years ago the pyramids were in a much better alignment with the three stars in the Orion Belt than they are today and that is because of a circum-polar movement of the stars. I will not get too much into the science of this today.

These stones were originally built as portals in alignment with star systems that they, the ancient peoples, saw at the time. Now when you – not you personally – when scientists or archaeologists go and look at the stone systems they may not see the alignment because the stars are in a different position now, than maybe 5,000, 8,000 7,000 years ago that they saw. Now they can project backwards and there are computer programs now that are very effective in going backwards and looking at star alignments and they could say “well this is what the star system was like and this is why they built it because they wanted it to be in alignment with that star system” and they felt that they were building a portal with that star system and that is beautiful.

I would say then that there are many stone systems around the planet that have these alignments and that they were portals to certain star areas and it shows the ancient peoples were much more in alignment with the galaxies – and they did not know they were galaxies – and the star systems, because they lived very

closely, they lived under the sky and many of them were worshipping the stars and were using them as spiritual energies for connecting with the star families.

**Q12. Ivan on Gold Coast asks:**

Juliano, how safe is it to take the journey in becoming a breatharian? What do the Arcturians think about this modality and do they recommend it?

**A** My understanding is that a breatharian is believing they could live off of breath as opposed to food. So, I do not think it is necessary. I view that as, say, somebody who is learning to walk on water. Okay, it is possible to walk on water. You can project through many years of practice, the electromagnetic energy field technique of raising your body and walking on water. It does show great psychic powers, it does show great psychic gifts but it does not bring you necessarily closer to the ascension. What you are wanting to do is to spiritually evolve and the goal that we are teaching is not to develop psychic gifts, as interesting and as powerful as that is and in some ways might be helpful, but our goal is to help you to complete your soul lessons so you can graduate from the Earth.

Why spend all the time doing something like this which will perhaps show the value of how you can live on liquid air or liquid light but you are still on the Earth and therefore I am not encouraging that activity. I think it is interesting but it is like other psychic activities. It is fascinating, it might be impressive but let us get to the soul work and the work is that you want to ascend and graduate from the Earth. I would ask the question how would doing that breatharian contribute to your ascension?

**Q.13 Ivan on Gold Coast asks:**

Juliano, Is the Freemasons organization a good institution? Is it based in Love, Harmony and Brotherhood or Darkness and which civilization created it?

**A** The idea of the Freemasons in our study comes from the Gnostics which developed at the time of Christ and had schools throughout ancient Rome and even into the Middle Ages. The idea of the Gnostics is that there is a secret knowledge about how the universe works and this secret knowledge is only available to those who know where to study, who to study with and which books to read. The Freemasons have an ancestral link to the Gnostics and they are studying, promoting what they feel is the secret truth of the world.

I think that this is a good thing that they would do this but we still would say that it is an organisation and people, especially on the Earth, can misuse organisations. There are some good people that are Freemasons, there might be some bad people. There are Freemasons who are tied in with unity consciousness and with higher occult practices for example, and then there are Freemasons who may have used that power or that knowledge egotistically or narcissistically for personal gain.

I think as an organisation it may try to keep pure but we are not promoting it and I would say that the effectiveness of a Freemason organisation would depend upon the group of people that you are with, if they are more open and if they are not self-centred. But it is just like any organisation, there could be people who want to use it for specific self-interest. But overall, they have been seeking to promote some of what I call the secret knowledge that is similar to the Gnosticism.
